About me

Hello! I am Xabier, after dedicating myself professionally to ecosystem management from an intersectional point of view, I decided to make a 180 degree turn in my professional career, and make the leap to Fullstack Web Development, developing an intensive FullStack Web Development Bootcamp at IronHack.

The technologies we used during the bootcamp are Javascript (ES6), Node.JS, Express, MongoDB, React, HTML5 & CSS3.

Full Stack Projects

[TrackMate](#)

This is a FullStack project. It has two user roles, customer and carrier. When the carrier takes a customer's package en route, the latter can see the position of their package in real time.

[iDeals](#)

Developed using JavaScript, Node.js, MongoDB, Express, HTML, CSS, Bootstrap, Mongoose, Nodemailer and Fly.io technology, it simulates a website where users can upload posts about the latest offers in their area.

[Dragon Ball Jump](#)

Game developed using Javascript (ES6), HTML5, CANVAS & CCS3 technology.

Experience

Head of department

Ibertrac, S.L. | April 2019 - March 2022
